Create an account

Providers list

Login with  
a QR code

2-6. First, enter the extension account information notified by VoiP+ in the "**Username**" and "**Password**" fields as follows.

The image shows a mobile application screen titled "Account setup" with an orange header. Below the header, there are two input fields. The first field is labeled "Username @ PBX/VoIP provider" and contains the text "#####". The second field is labeled "Password" and contains a series of dots. To the right of the password field is a small icon of a crossed-out eye. Below the password field is a grey placeholder text that reads "For example K23Rdw32". A large green button with the text "Create an account" is positioned below the input fields. At the bottom of the screen, a standard QWERTY keyboard is visible, with the "English" language indicator and a checkmark button.

Username: 7-digit extension number

Password: SIP password

2-7. After entering your username and password, tap **"Create an Account"**.

The image shows a mobile application screen titled "Account setup" with an orange header. Below the header, there are two input fields. The first is labeled "Username @ PBX/VoIP provider" and contains the text "#####". The second is labeled "Password" and contains a series of dots. To the right of the password field is an eye icon. Below the password field is a grey hint box containing the text "For example K23Rdw32". A large green button with the text "Create an account" is centered on the screen and is circled in red. At the bottom of the screen, a standard QWERTY keyboard is visible, including a numeric keypad, a globe icon for language selection (set to "English"), and a checkmark icon.

2-8. Next, enter the following in the "**hostname**" field.

After entering, tap "**Next**".

**Account setup**

Fill in your hostname and select your provider from the list

hostname or provider  
sp.voipplus.net

This could be called 'Domain', 'SIP Server', 'Registrar' or 'SIP Proxy'. For example 'sip.example.com' or '123.21.123.32:5060'.

Or you can just search for the name of your provider. May be we know the settings.

**Next**

hostname: **sp.voipplus.net**

2-9. Please tap **"Skip"** without entering any information on the screen for setting the outbound proxy.

## Account setup

- My provider/PBX requires an authentication username or outbound proxy

Authentication username

---

Outbound proxy

---

**Skip**

2-10. When the account information is correctly entered, the message "**SIP UDP Found**" will be displayed.

If the account is not found, please tap "**Finish**" to proceed as you will be asked to re-enter the account information at the end of the setup..

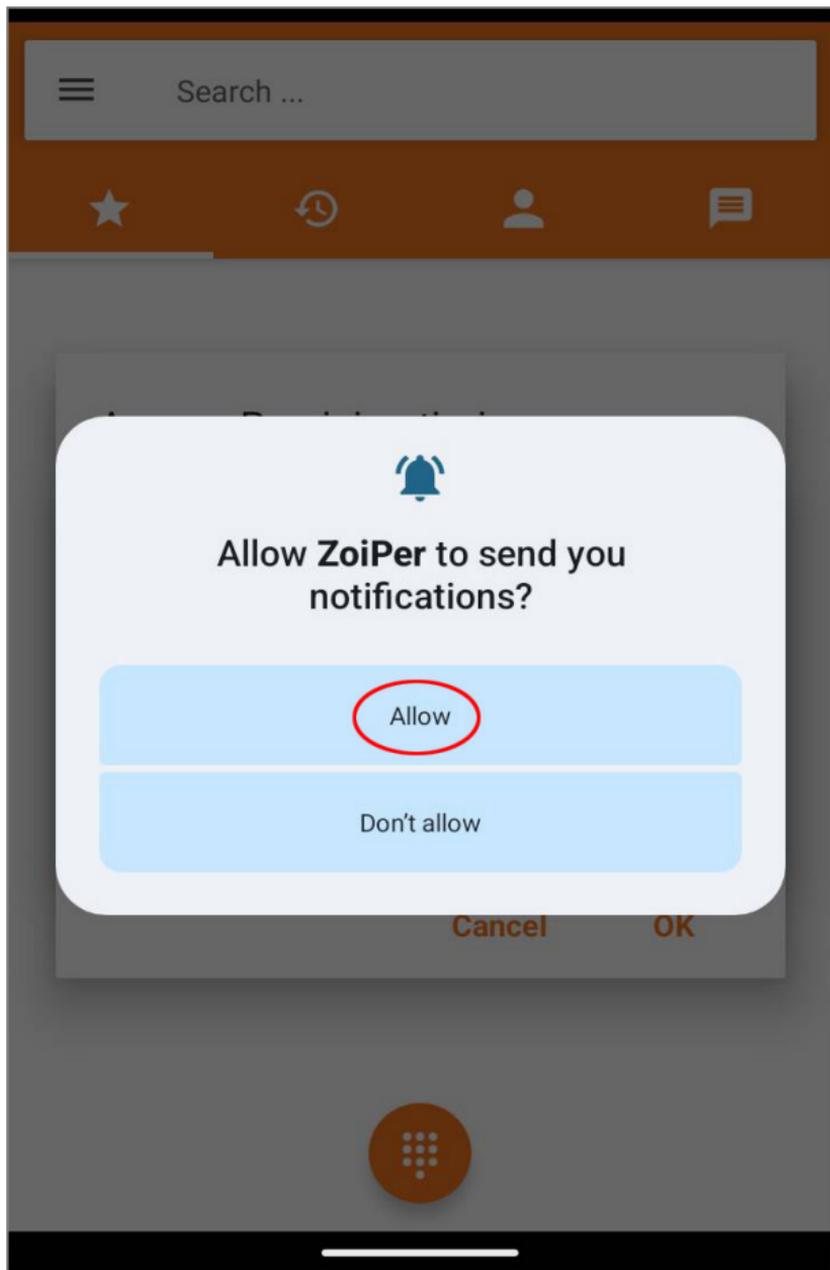

**Account setup**

Please choose between the following configurations

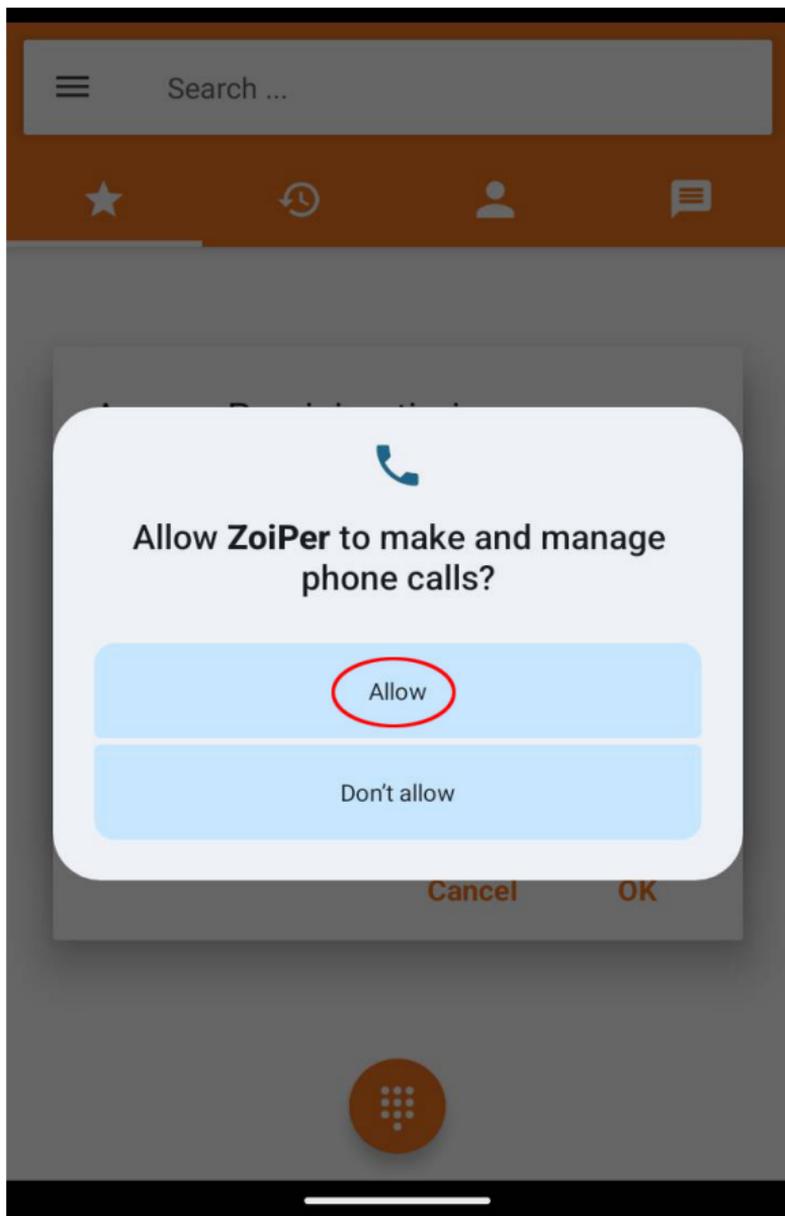

<input type="radio"/> SIP TLS	Not found
<input type="radio"/> SIP TCP	Not found
<input checked="" type="radio"/> SIP UDP	Found
<input type="radio"/> IAX UDP	Not found

**Finish**

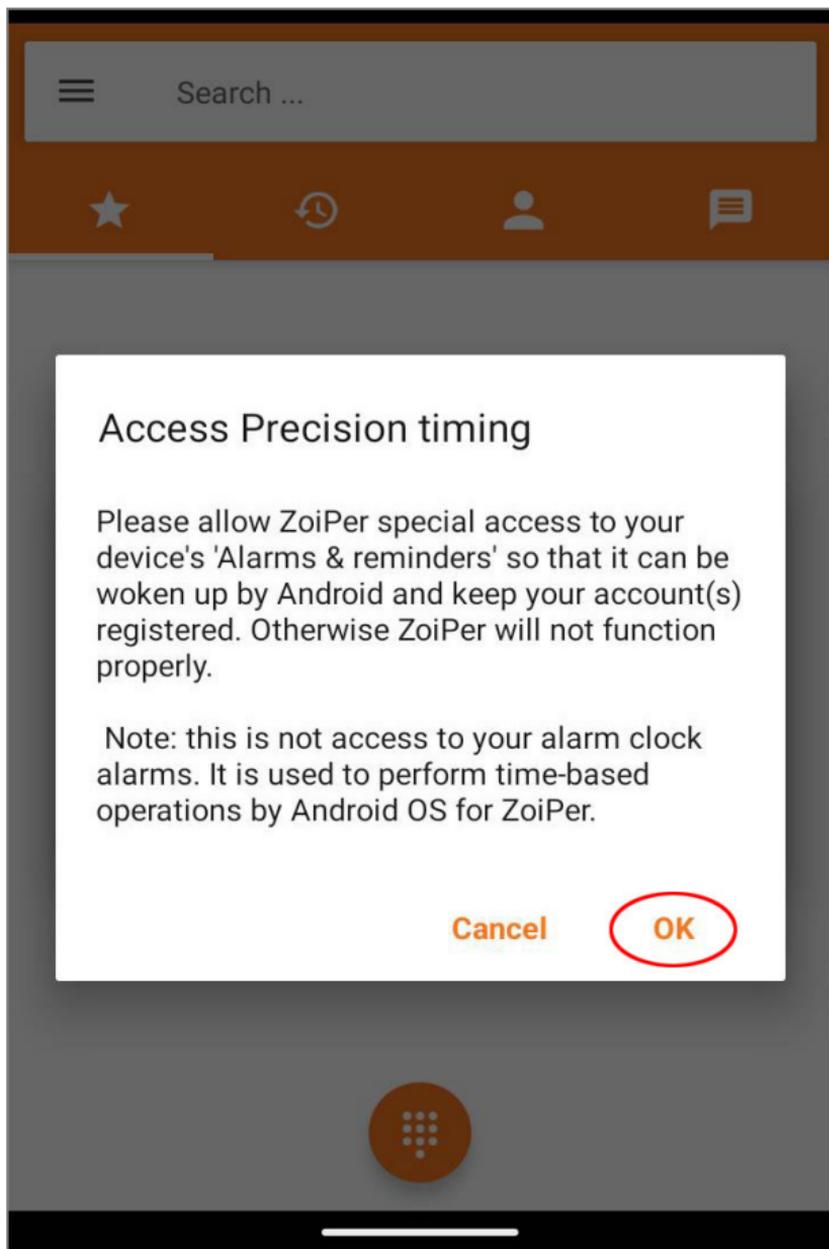

2-11. "Allow ZoiPer to send you notifications?" As it is displayed, Let's tap "**Allow**".

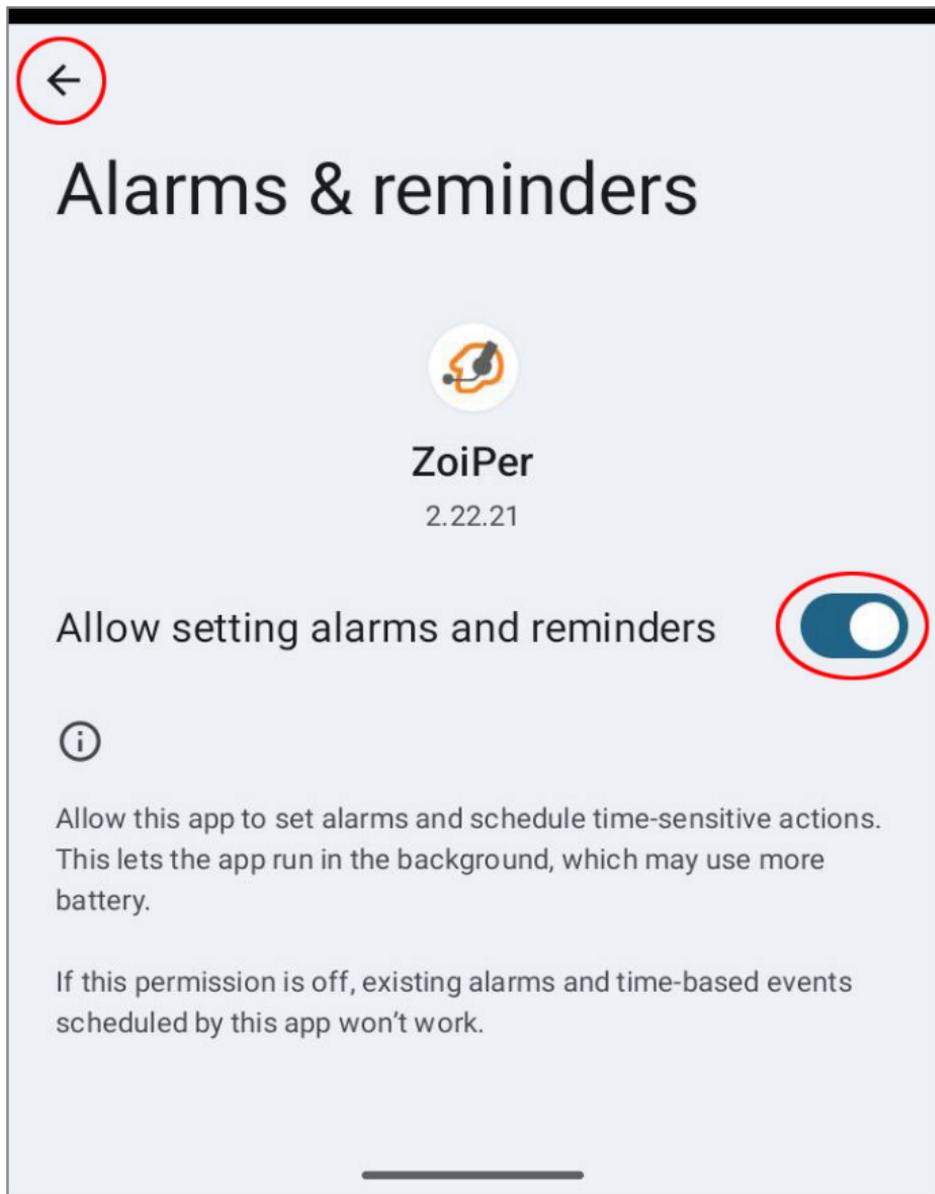

2-12. Next, "Allow ZoiPer to make and manage phone calls?" As it is displayed, let's tap "**Allow**".

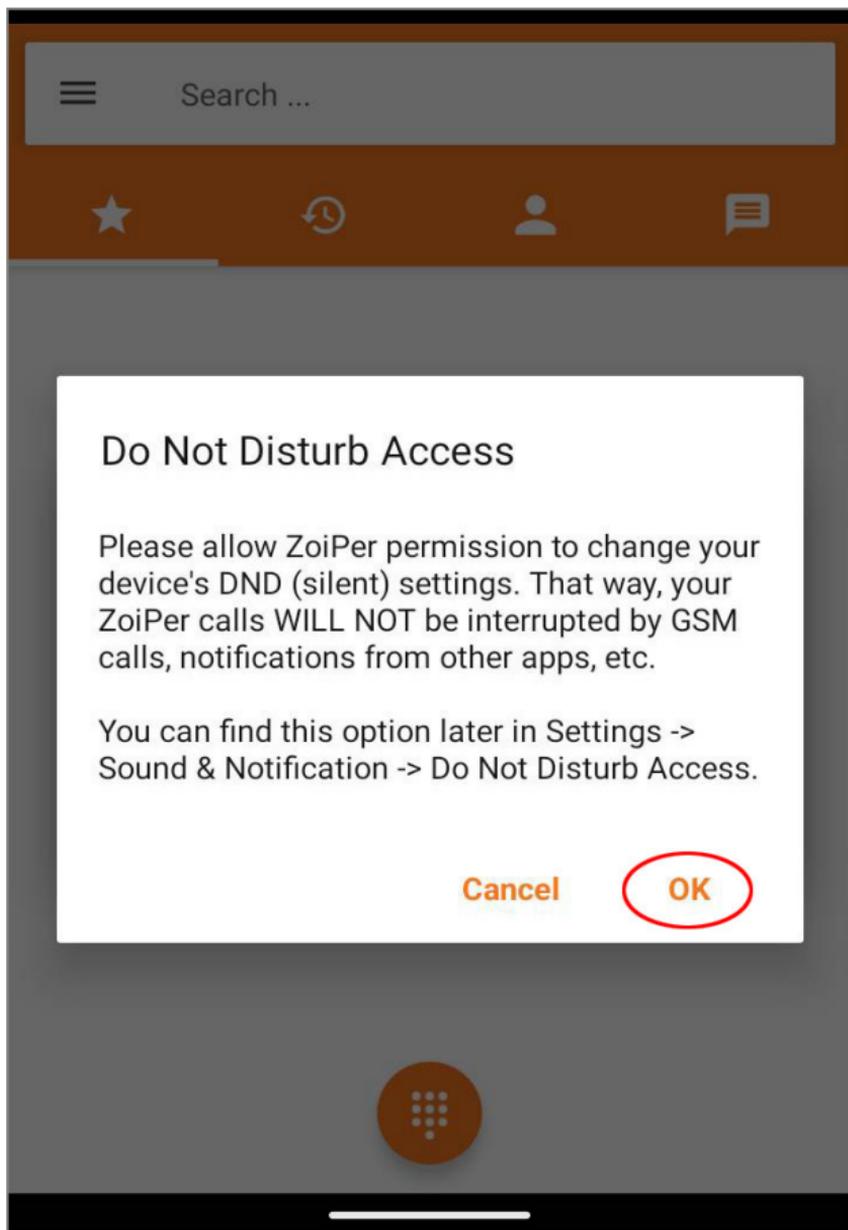

2-13. "Access Precision timing" As it is displayed, let's tap "**OK**".

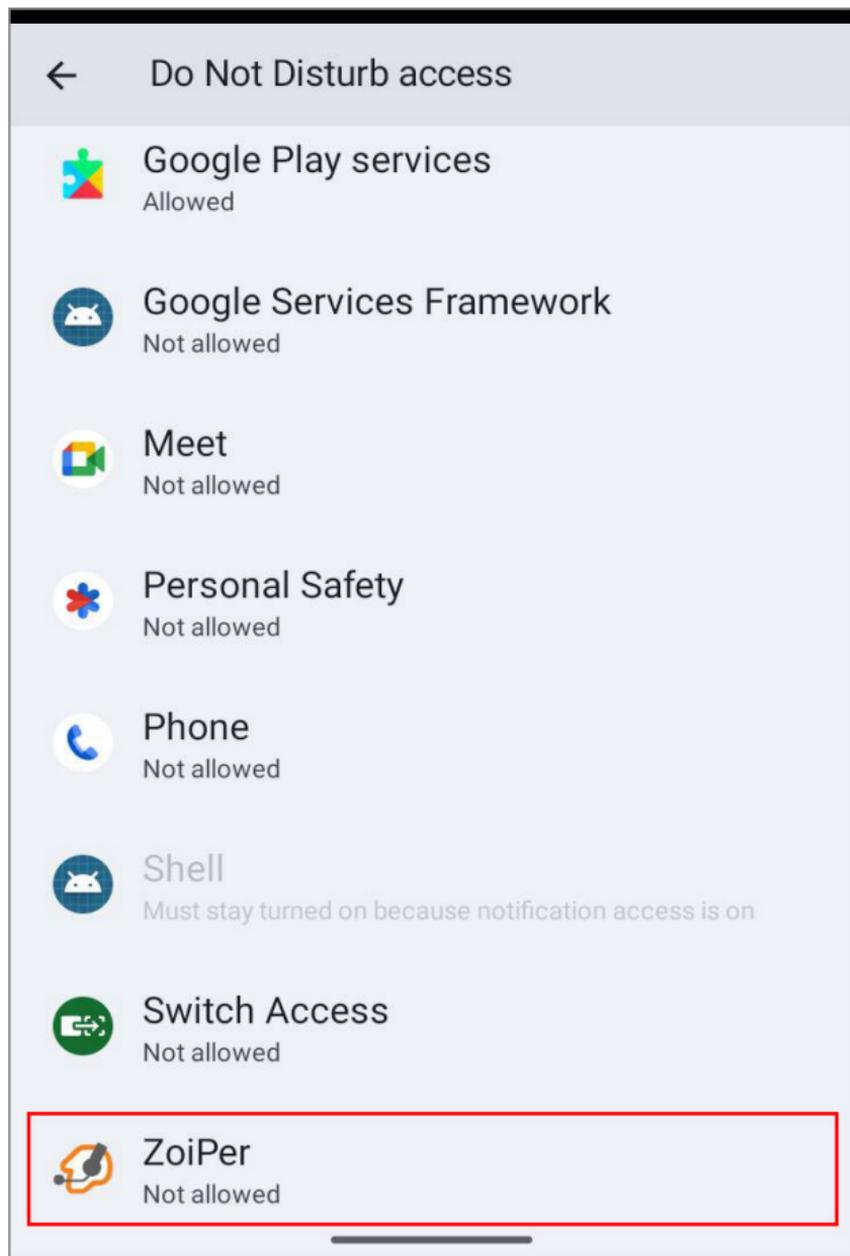

2-14. "Alarms & reminders" As it is displayed, let's tap "**ON**". Then tap the back arrow "←".

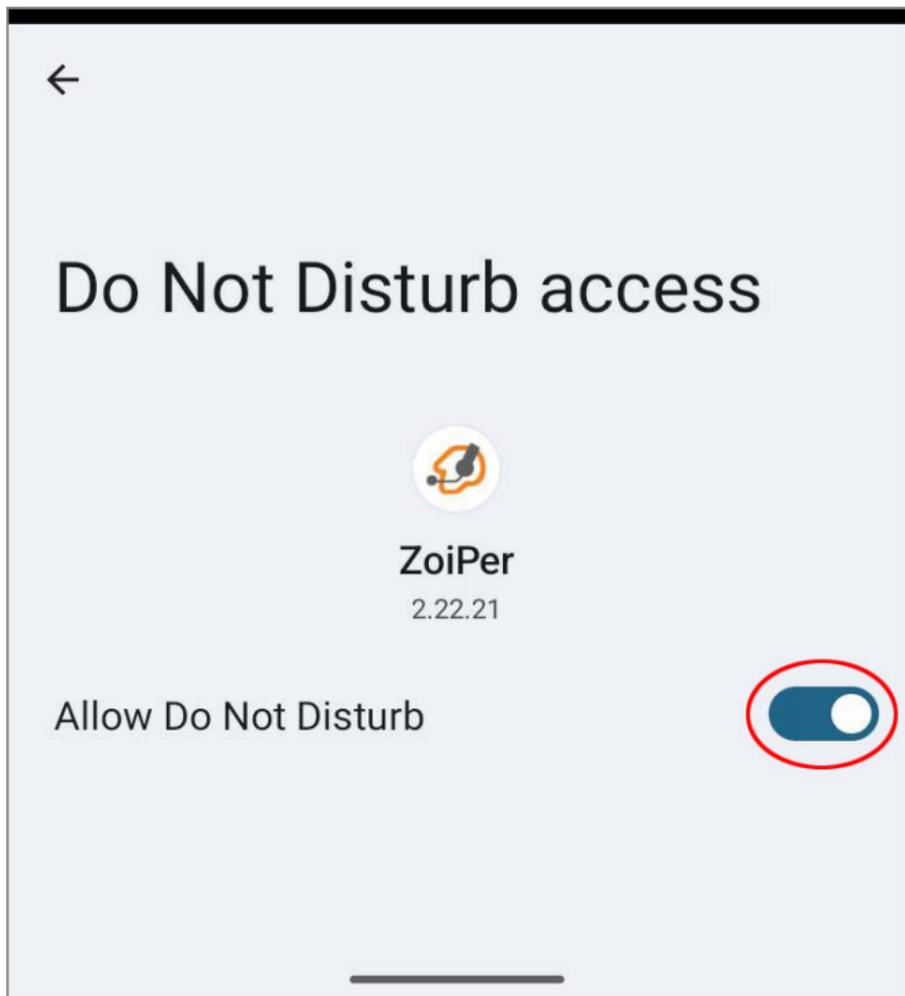

2-15. "Do Not Disturb Access" As it is displayed, let's tap "**OK**".

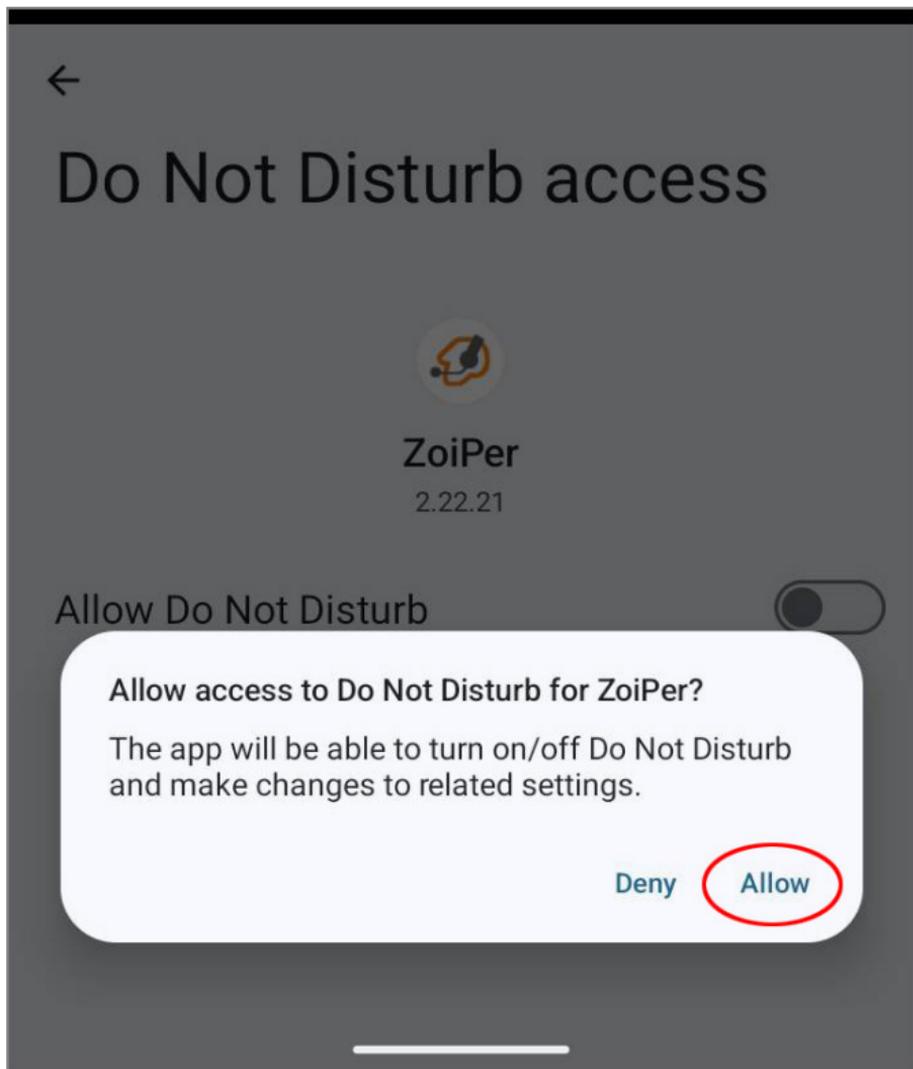

2-16. Tap "**ZoiPer**" at the bottom of the "Do Not Disturb access" settings screen.

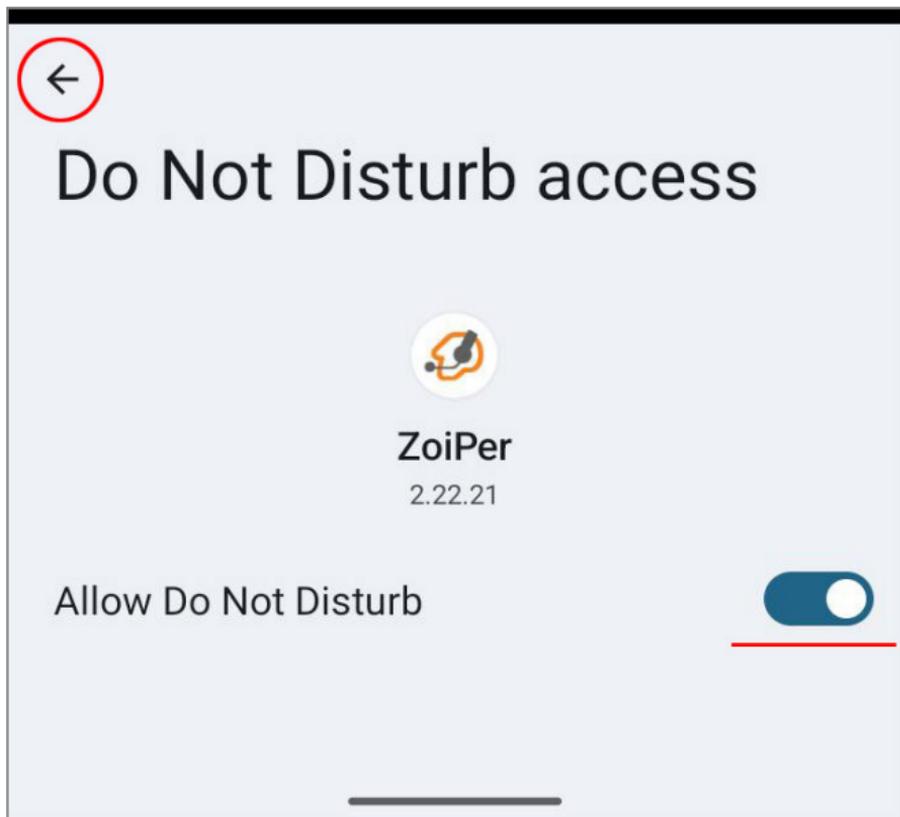

2-17. Turn **ON** "Allow Do Not Disturb".

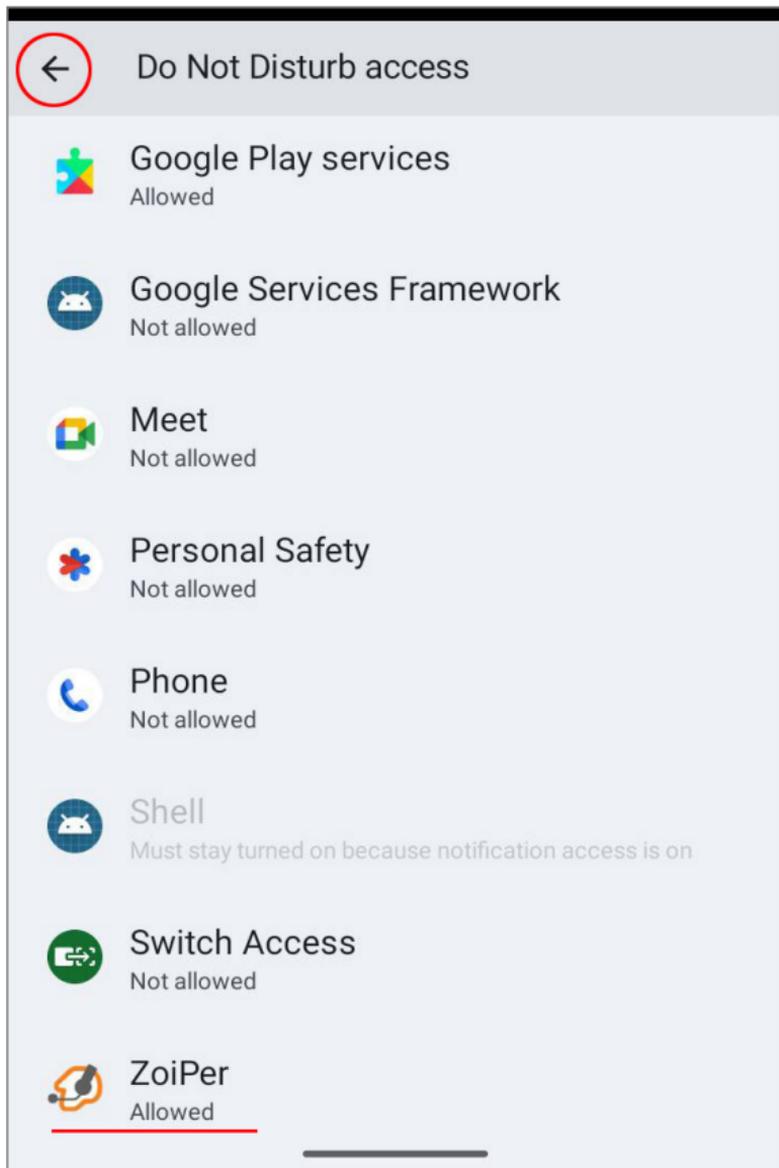

Tap "**Allow**" when asked "Allow Access to Do Not Disturb for ZoiPer?".

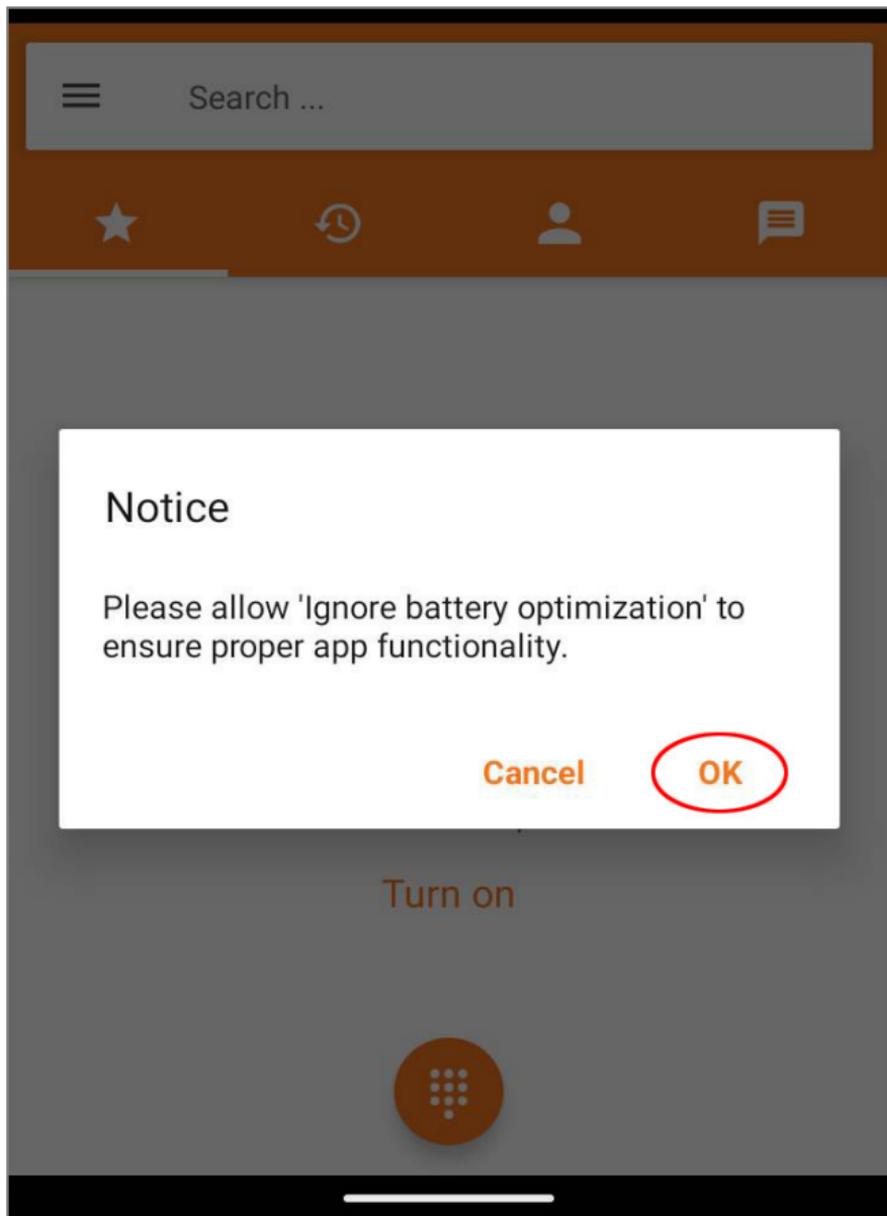

2-18. When "Do not disturb access" changes to "ON", tap the **back arrow**.

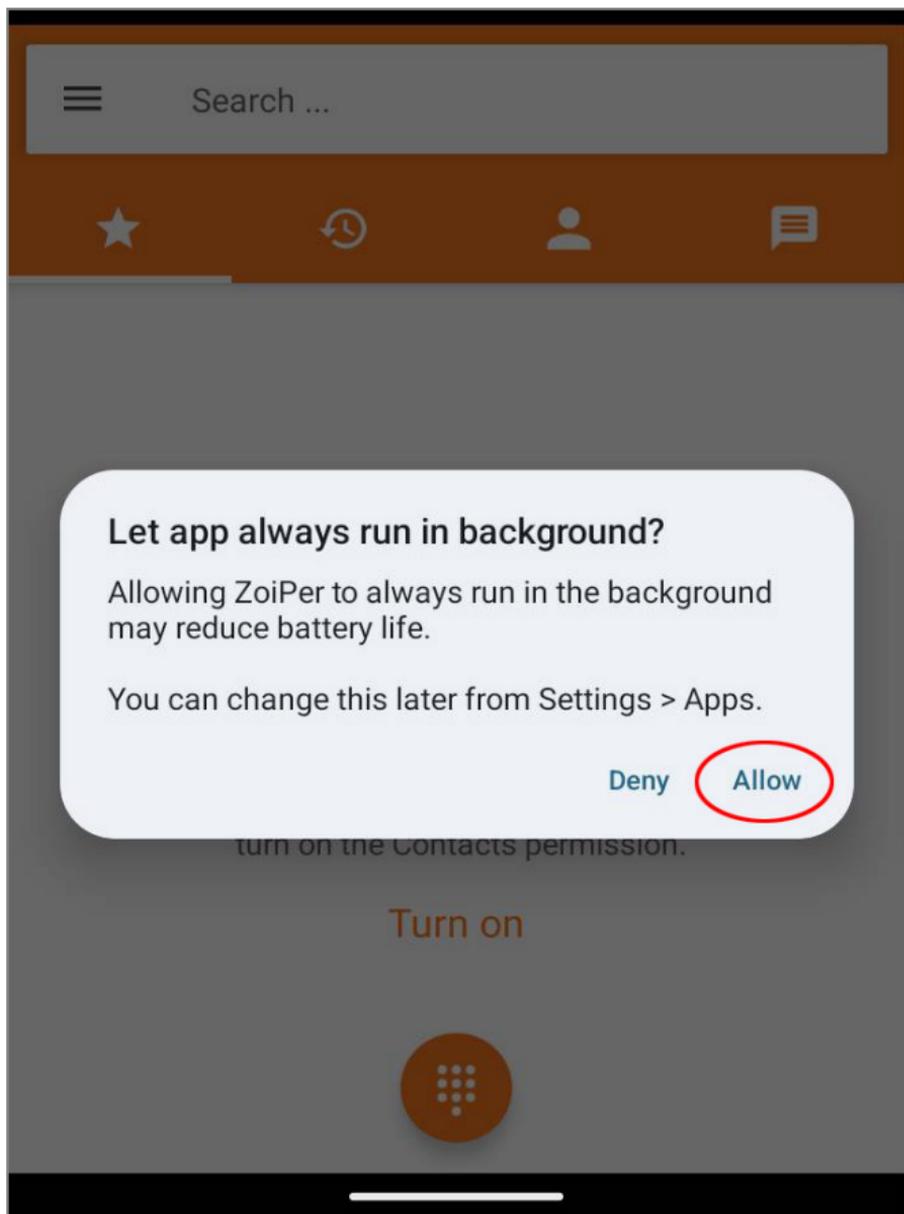

2-19. Once you have confirmed that the “**ZoiPer**” at the bottom of “Do not disturb access” is marked “**Allowed**”, tap the back arrow. screen.

2-20. Tap "**OK**" for the "Ignore battery Optimization" setting.

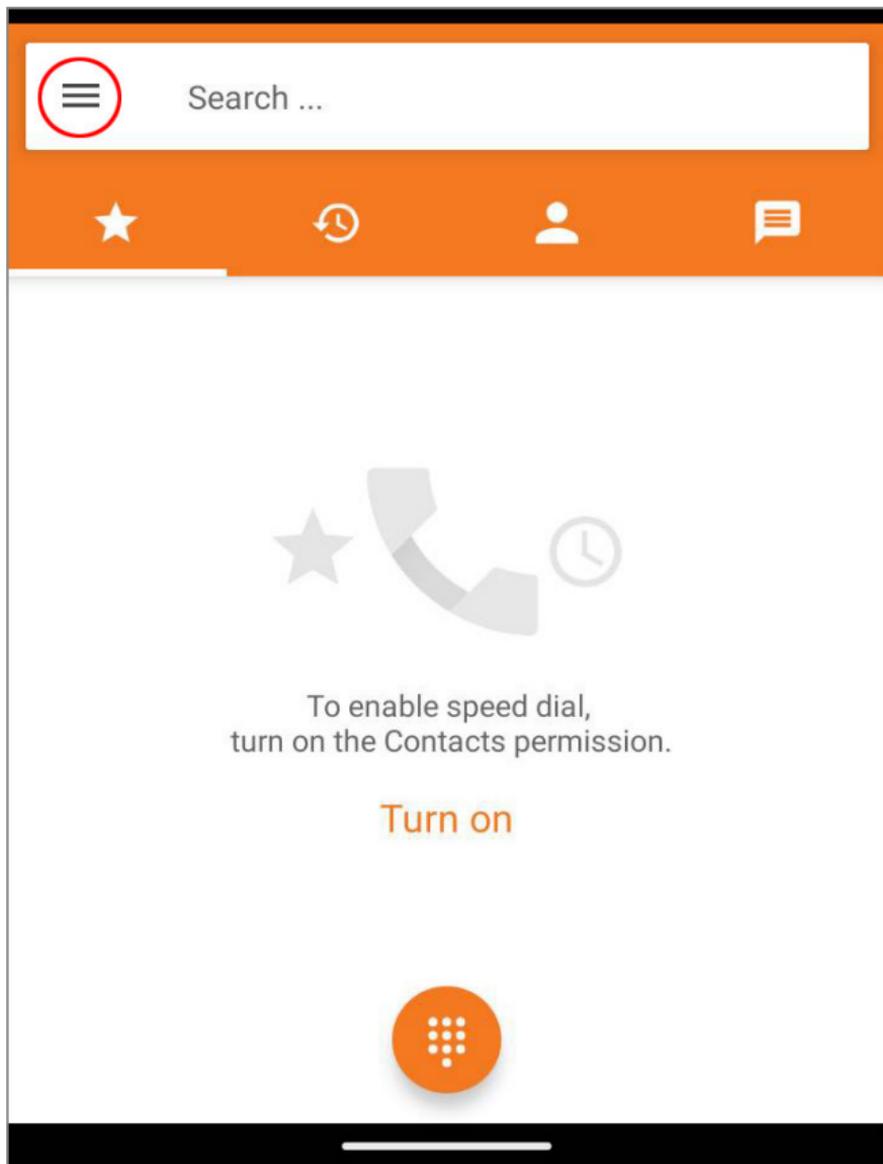

2-21. Tap "**Allow**" when asked "Let app always run in background?".

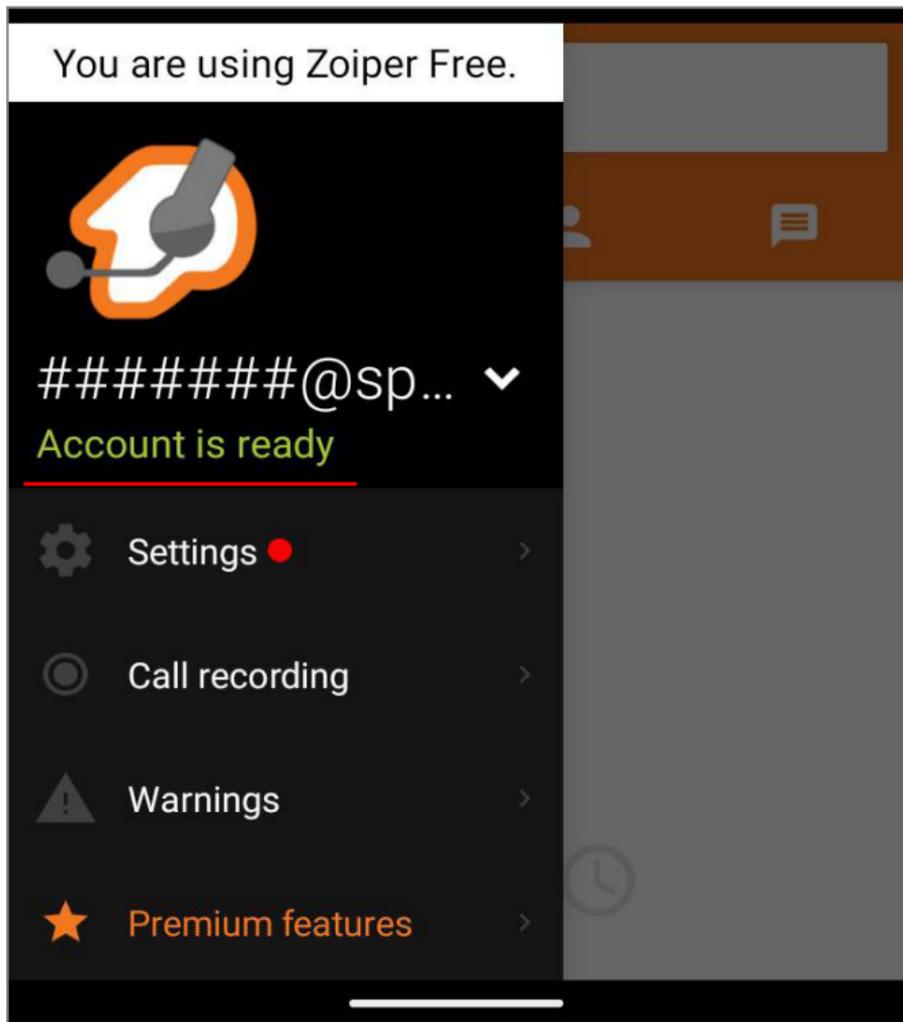

2-22. This completes the setup.

Please tap the **menu icon** in the upper left corner of the screen for confirmation.

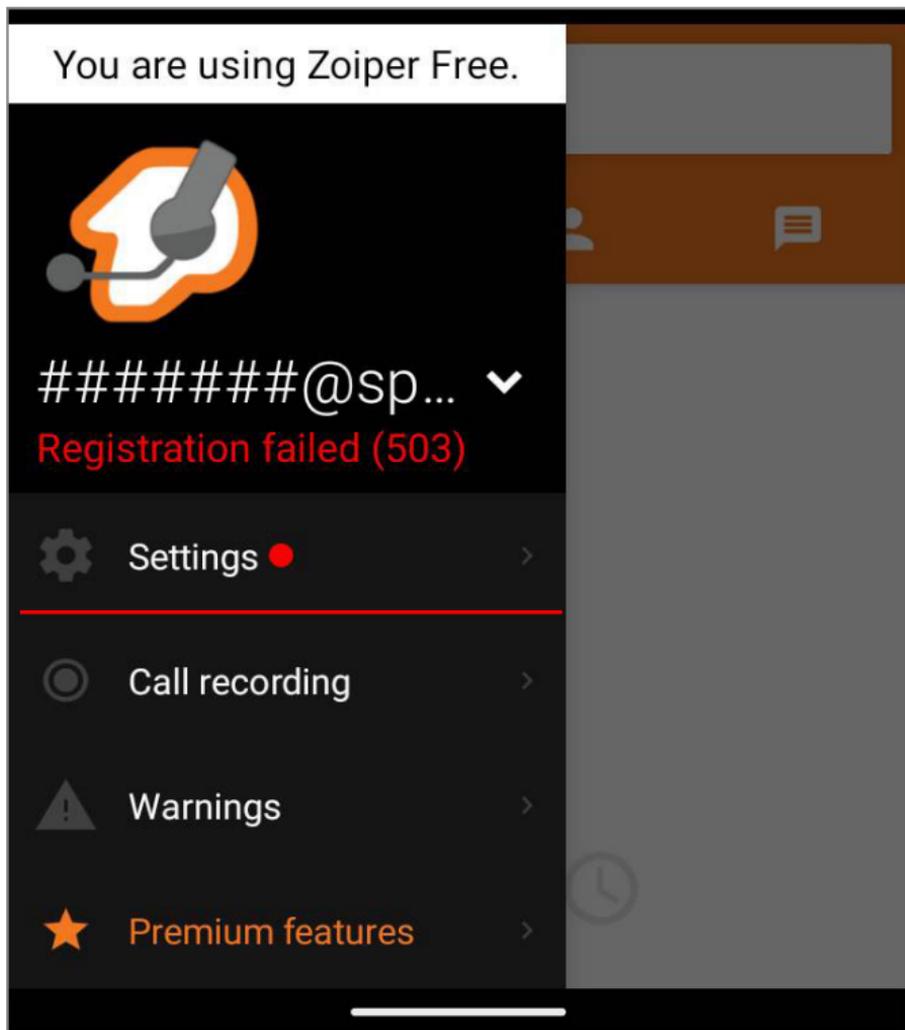

2-23. When "**Account is ready**" is displayed under the extension number you have set, you are ready to make or receive calls.

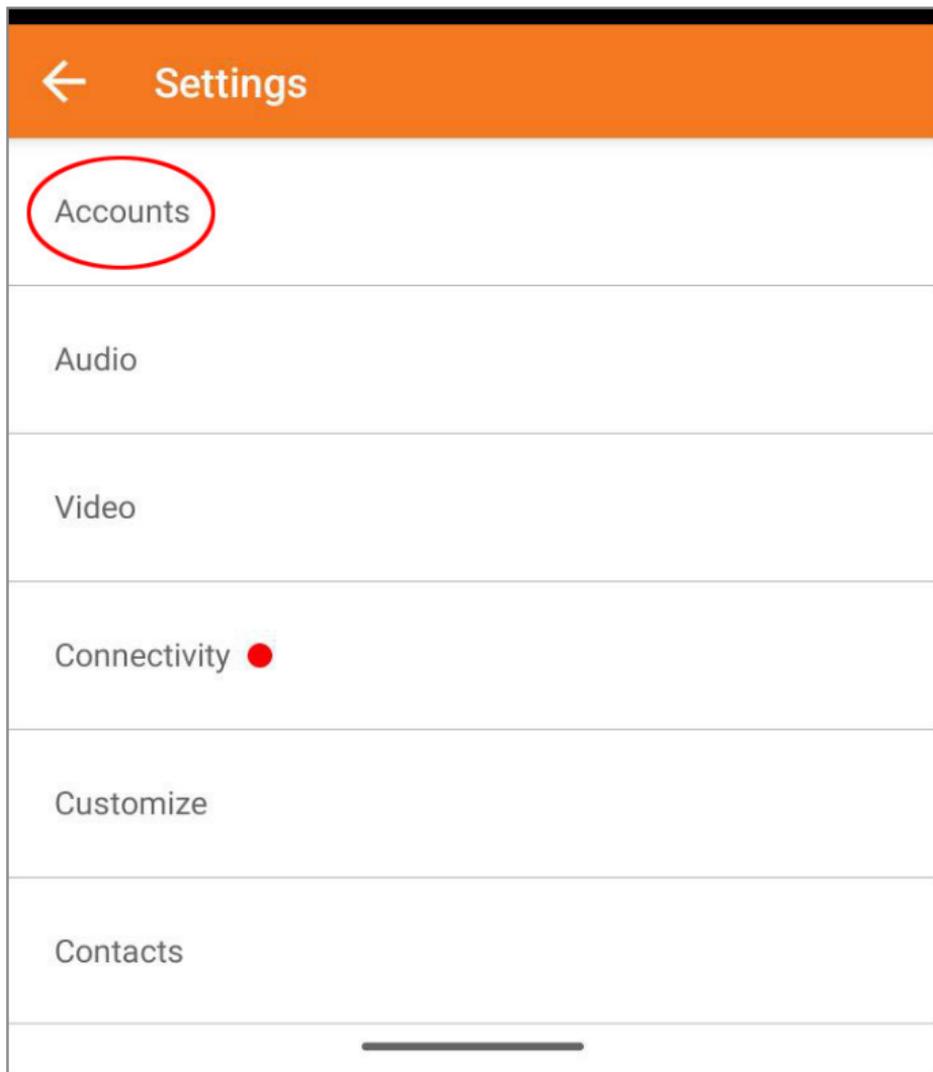

2-24. If the message "Registration failed" is displayed, tap "Settings".

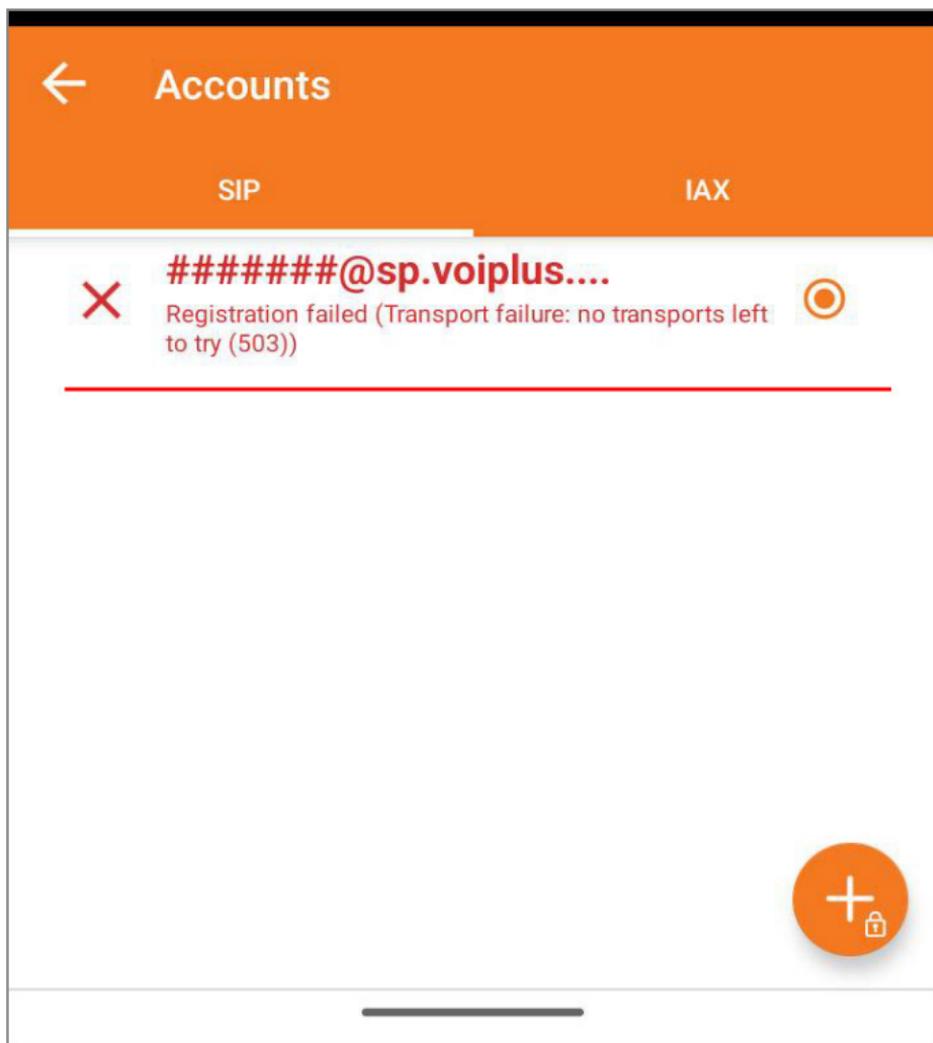

The same applies if the account could not be found in steps 2-10.

2-25. Tap "**Accounts**" in the Settings menu.

2-26. Tap the account that “Registration failed”.

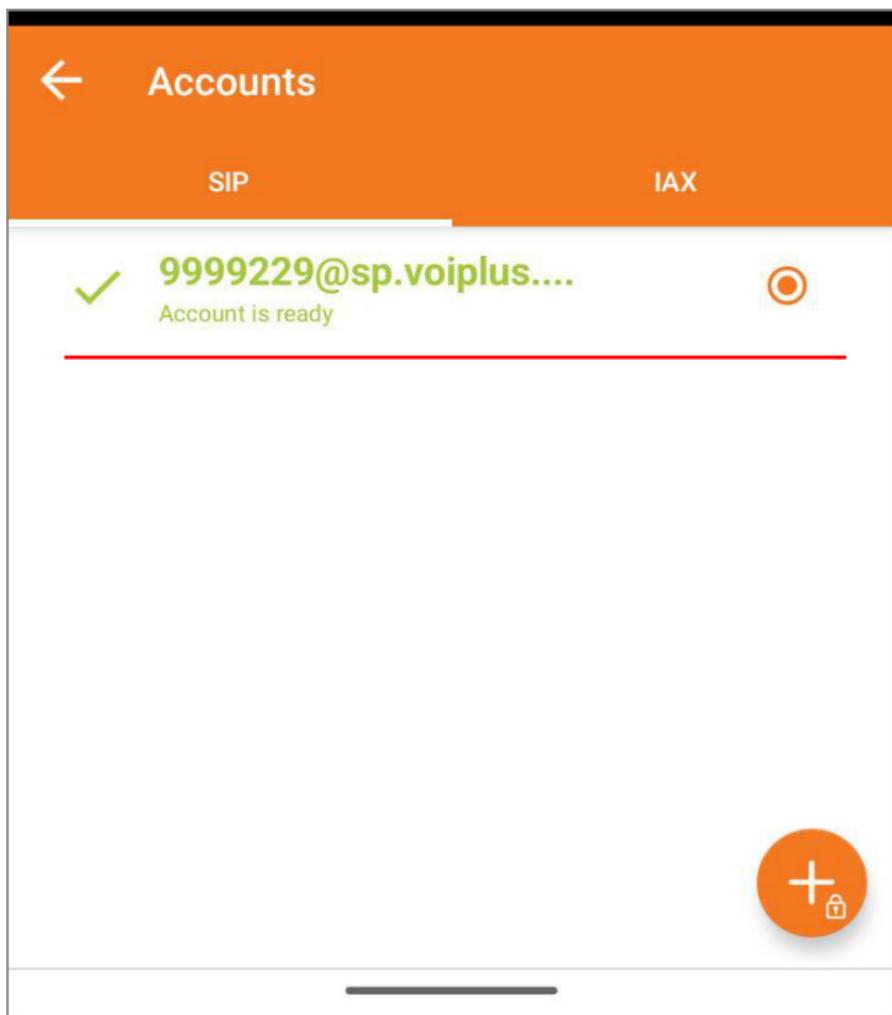

2-27. Please make sure that the "Username" and "Password" are correct and enter them correctly.

SIP Account	
Account Name	#####@sp.voipplus.net
<b>Authentication</b>	
Host	sp.voipplus.net
Username	#####
Password	*****
<b>Optional</b>	
Authentication User	
Outbound Proxy	

Please be careful not to input wrong information, because you will be blocked if you fail several times in a row.

2-28. When "**Account is ready**" is displayed, the process is complete.

If registration fails even after entering the correct information, uninstall the application and try installing it again.

### 3. Information

For call to Japan, you can enter from the area code.

For international calls, dialed by **002, country code, area code excluding the first zero, local number.**

Depending on the version of the android, may be disconnected when you switch the network to WiFi and 4G

In this case, if you log in as a member on the website and turn on **Registry Alert**, you will be notified by email at disconnection.

Thank you for using VoiP+.
